

See the Loss. Stop the Bleed. Recover the Margin. **FMS Track-It™ Shrink & Markdown**

Most shrink goes untracked until it shows up on the P&L. Track-It™ gives you daily visibility into where loss is happening – by department, item, and reason – so you can act before it compounds. And when product needs to move, our markdown tools help you recover value instead of throwing it away.

Why Choose FMS and Track-It™?

- **Know Where You're Losing:** Track shrink by department, item, and reason – and compare performance across stores to find patterns before they become problems.
- **Respond in Real Time:** Daily and weekly reports put the right data in front of the right people, so your team can act fast – not after the fact.
- **Turn Aging Product Into Revenue:** On-demand markdown labels and customizable rules by department, UPC, or PLU help you clear slow movers while protecting margin.
- **Connect Loss to Your Bottom Line:** Record shrink directly into your financial system so every loss is accounted for – and every recovery shows up where it counts.

Features:

- ▶ **Shrink by Department & Reason**
- ▶ **Transfer Tracking**
- ▶ **Markdown Label Printing**
- ▶ **Customizable Markdown Rules**
- ▶ **Daily & Weekly Reports**
- ▶ **Online Querying Tools**
- ▶ **Multi-Store Reporting**

Profit Protection System

Track shrink by department, item, and reason with daily and weekly reporting. Compare results across locations, identify problem areas fast, and feed loss data directly into your financial system.

Markdown Program

Print on-demand markdown labels with tamper-resistant design. Set customizable rules by department, UPC, or PLU to move slow inventory efficiently – and track every reduction by day, week, or department.

Transfer Tracking

Record departmental and inter-store transfers accurately to eliminate unaccounted loss. Every product movement is documented, so your shrink numbers reflect reality – not guesswork.
